

T300 Extreme Curve

The T300 Extreme Curve combines versatility and precisely controlled operating parameters with an ergonomic design and interface for easy operation, speed, accuracy and productivity. The T300 Extreme Curve will easily allow you to seam curves and irregular shaped panels needed for producing inflatable products.

T300 Extreme Curve Seam Type:

T600 Extreme Curve

The T600 Curve hot air and hot wedge welding machine is packaged with everything you need to weld curves and unique shapes for the production of inflatables, tanks, bladders and other uniquely shaped products that have to hold liquid or air. Use this machine to achieve water tight hot air seams.

T600 Extreme Curve Seam Type:

T500 Double Heat System

The T500 custom inflatable machine will easily allow you to seam curves and irregular shaped panels needed for producing inflatable products. The machine is designed to allow you to make a butt seam on both the inside and the outside of the weld. This form of welding helps to prevent water from leaking through the scrim of the material a condition called wicking.

T500 Custom Inflatable Seam Type:
