

T300 Extreme Flex

The T300 Extreme Flex is used to put sidewalls to pool bottoms in conjunction with a rotating table or a hanging system. This hot air and hot wedge welding machine combines versatility and acutely controlled operating parameters within an ergonomic design and interface for easy operation, speed, accuracy, and productivity.

T300 Extreme Flex Seam Types:

T600 Extreme Flex

The T600 Extreme Flex will easily allow you to seam your panels together, hem the ends faster than any other technology on the market. With it's longer throat the T600 will increase your production while decreasing fabric handling. The T600 is equipped with a Miller Weldmaster Smart Screen for easy recipe recall.

T600 Extreme Flex Seam Types:

112 Extreme

The 112 Extreme is used to produce pool covers and sidewalls with its traveling head. This hot air welder is easy for the operator to use. With precision-controlled welding parameters, easy recall settings and an ergonomic design, the 112 Extreme hot air welding equipment is built to take production and efficiency to the next level.
