

# Tarpaulins & Covers

## Spec Extreme

The Spec Extreme Wedge Welder has been designed as a “specific”, single purpose welding machine to accomplish a particular weld style. It maintains a noiseless operation and has a patented self-centering wedge for accurate product placement. The Spec Extreme is designed to be used as a stationary unit or an automatic welder for long seams while traveling on a track.

Spec Extreme Seam Type:

## Triad Extreme Cover

The Triad Extreme Cover is designed for tarp and cover applications. It is built with a wider base allowing for larger diameter pockets. It maintains a noiseless operation and has a patented self-centering wedge for accurate product placement.

Triad Extreme Cover Seam Type:

## T300 Extreme Flex

The T300 Extreme Flex hot air and hot wedge welding machine combines versatility and acutely controlled operating parameters within an ergonomic design and interface for easy operation, speed, accuracy, and productivity. When you need to weld overlap and edge seams, this hot air and hot wedge welding machine can handle the job.

T300 Extreme Flex Seam Type:

## Tarpaulins & Covers

### T300 Extreme Travel

The Miller Weldmaster T300 traveling tarp welding machine uses a T300 welding machine and puts it on a platform that moves along a track allowing easier material handling for the operator and alleviating the weight of a long heavy piece of fabric. This hot air and hot wedge welding machine will make life easier for your employees by making large jobs easier to handle.

T300 Extreme Seam Types:

### T600 Extreme Cover

The T600 Extreme Cover is packaged with everything you need to weld all types of covers from truck tarps to ground covers. The T600 Cover can be equipped with hot air, hot wedge or both heat systems. It is able to seam your panels together as well as finish the edges of your products.

T600 Extreme Seam Types:

### 112 Extreme

The 112 Extreme is a hot air welding machine with a larger breadth of production capabilities. In addition, this hot air welder is easier for the operator to use. With precision-controlled welding parameters, easy recall settings and an ergonomic design, the 112 Extreme is built to take production and efficiency to the next level.

112 Extreme Seam Types:
